

Holiday Trees

For preschool age and up

Your Child is Learning

manipulation of materials • creative expression •
hand-eye coordination • fine motor skills like placing and gluing

Materials

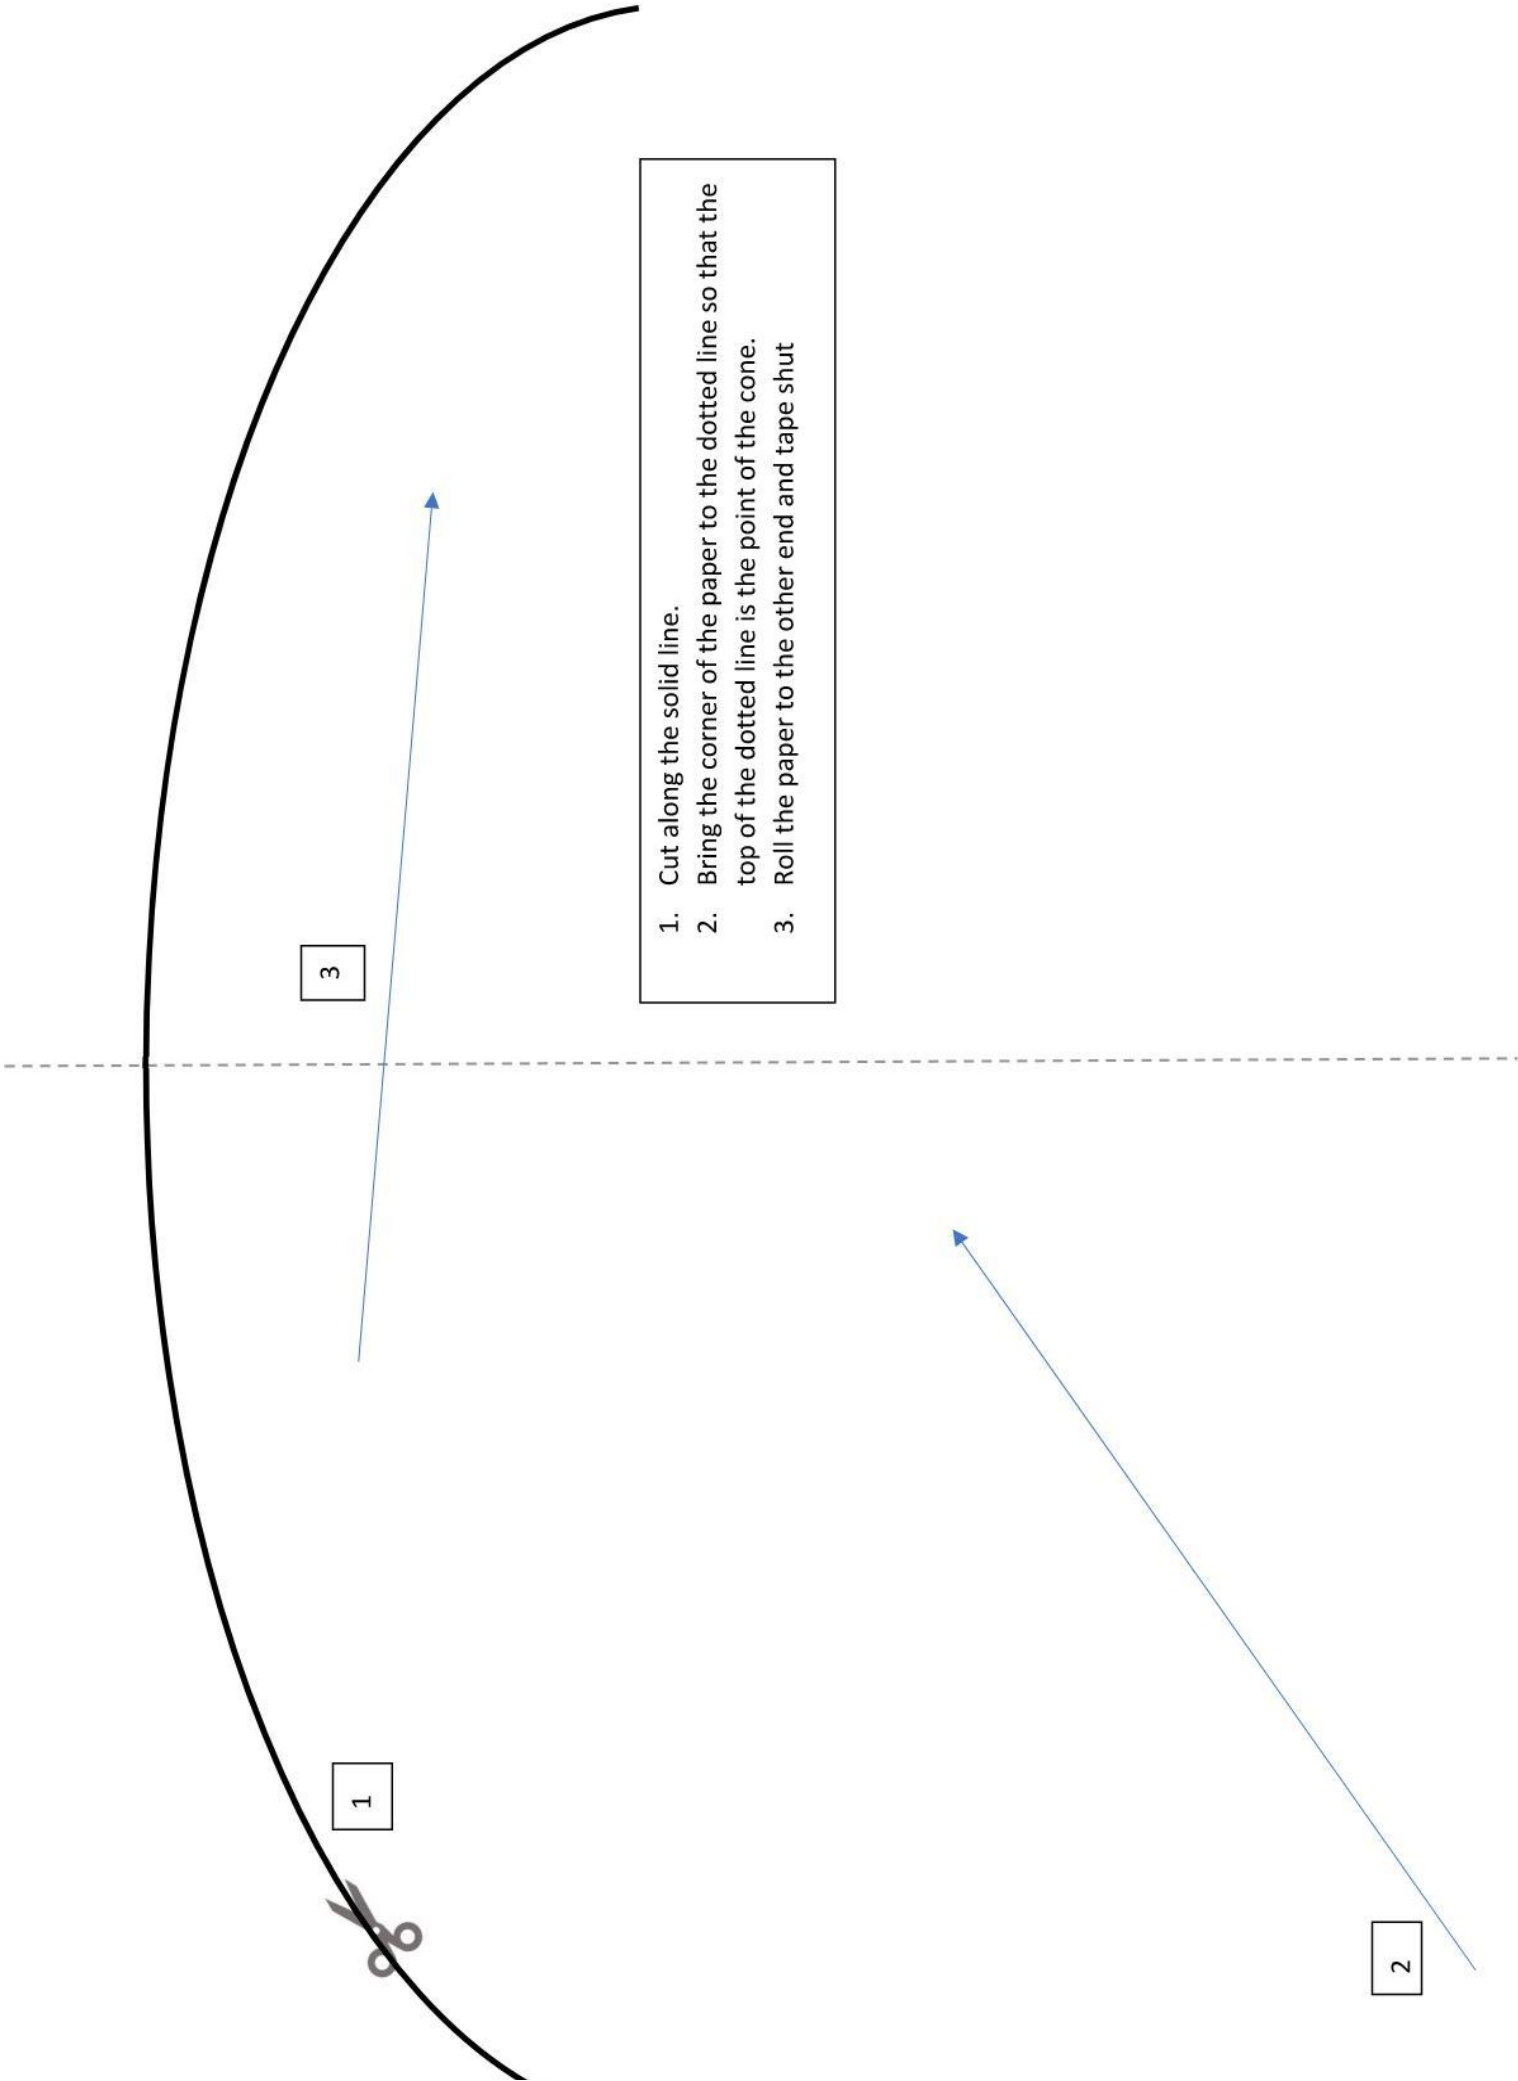

- Wrapping paper or scrap fabric
- Glue or tape or stapler
- Scissors
- Paper cone template

Process

Create a tree or a forest of trees with paper or scrap fabric

- Use the paper cone model to make a tree shape for your tree
- Cut long strips of your choice of either fabric or paper. Fringe one side of the long strips to give it an evergreen feel
- Use glue, tape, or staples to attach your strips to your cone.
Tip: start at the bottom and overlap the strips so you only see the fringe bits.
- You can decorate it further by adding pompoms, or paper shapes for ornaments.

1. Cut along the solid line.
2. Bring the corner of the paper to the dotted line so that the top of the dotted line is the point of the cone.
3. Roll the paper to the other end and tape shut
